

## Anywhere I go, I make the lab known!

Last week Kash was invited to a BACD (British Academy of Cosmetic Dentistry) meeting in Central London where they run various lectures and seminars across the UK based on Cosmetic Dentistry. The lecture was based on Smile Makeovers and was presented by Dr. Rahul Doshi, a Cosmetic Dentist based in London and Hertfordshire. The lecture was great and with Kash being the only technician in the room, it was evident that he would be answering a lot of questions that were thrown at him. The lecture itself provided information on golden proportions for smile makeovers, prep design and various stages of treatment with actual case studies that Dr. Doshi and treated.

It was made clear by the end of the lecture that the most important factor was..... Communication with the Dental Technician who was creating the veneers by providing information that is needed for the smile makeover, e.g. Written instructions, Primary impressions in silicone rather than alginate, Digital Imaging and Diagnostic wax ups to show the patient and create temporary veneers from the wax up which would reveal in a week or two, if the patient is acceptable of the veneers in terms of aesthetics and if its functionally correct with no chips or breakages in the temporary veneers. This provided realistic results which is achievable for the final veneers that are constructed based on the finding from the diagnostic, in a hindsight this provides predictable cosmetic Dentistry.

We are lucky enough as a Dental Laboratory to have worked with many Smile Makeover Cases with some of the leading Cosmetic Dentists in this game. *Ask Carlos or Kash for more information on how we can plan your next Smile Make Over case....* [www.bacd.com](http://www.bacd.com)

## The singing Dentist

We have all seen him on the internet with his youtube videos going viral, Dr Milad Shadrooh (pictured on the left) also known as the singing dentist has done many parody songs with cleverly written lyrics and was the guest DJ for a launch party in central London that Kash attended for the Dental Compass. What's dental compass you ask, its a educational study group for Dentists who would like to share and expand their knowledge in Dentistry. For more info go to

[www.dentalcompass.co.uk](http://www.dentalcompass.co.uk)

## FMC Dentistry Magazine and our Dental Laboratory

Who would of thought 15 years ago media studies as a subject would pay off, I have now been invited to join the editorial board for FMC Dentistry with various articles already published. Its a good time to be a part of the Bremadent Family as we now have a reach of thousands of potential dental professionals across the U.K. This year the laboratory has had massive milestones with many more in pipeline. *If yourself or a colleague have an interesting article that you think will make a good read, contact Kash today to be featured in the biggest Dental Magazine in the U.K.*

[www.dentistry.co.uk](http://www.dentistry.co.uk)

## Bremadent, Pioneers in Dentistry

As stated in the article above Bremadent Dental Laboratory have had the opportunity to work with some of the leading cosmetic Dentist in Dentistry. One of which being Dr. Neil Gerrard a multi award winning Dentist who recently won an award in the Aesthetics Awards 2016 alongside his brother Mr. Paul Gerrard who won technician of the year, both of which who have won various awards in the Smile Awards and are both accredited in the BACD with Paul being one of two technician in the whole of the UK having accreditation.

Bremadent have been pioneers in dentistry for decades and have created some of the most talented technicians and clinicians out there which cannot be disputed. We have decades of experience in this field of winning awards and obtaining accreditation. If yourself or one of your colleagues are looking to stand out from the crowd ask Bremadent Dental Laboratory today and plan your next case, to be an award winning case.

*Clinical Work by Dr. Neil Gerrard, Technical Work by Mr. Paul Gerrard.*

## Prep Design for Emax Veneers !

### Veneers

#### VENEER PREPARATION

A medium grit, round-ended, diamond bur is used to remove a uniform thickness of facial enamel by joining the depth-cut grooves.

#### INCISAL PREPARATION

The diamond bur is angled to bevel back the incisal edge.

#### CHAMFER MARGINS

Correct preparation of the chamfer margins interproximally allows the appropriate bulk of porcelain.

\*Please note: For additional masking capabilities and/or layering techniques, further reduction may be necessary. Contact your laboratory for further information.

For a full Prep guide go to [www.bremadent.co.uk/clinical-guides](http://www.bremadent.co.uk/clinical-guides)

We offer the full range of complete prosthetic products from standard acrylic dentures to Swissedent All on 4 implant dentures. Our Prosthetics department is run by our Clinical Dental Technician Kash Qureshi who also runs the Swissedent Denture Clinic to treat patients for dentures. Kash has an understanding of the clinical and technical aspect of prosthetics by dealing with over 400+ denture related cases weekly and can communicate jargon free clinical support throughout.

We train all our technicians in-house on the Swissedent natural denture system to maintain and monitor our Prosthetics standard. Swissedent utilises the patients facial and smile features, age and gender to produce natural dentures that restores physical appearance, optimum aesthetics and function, tissue support and comfort that benefits the patient, clinician and laboratory.

We provide a full range of partial prosthetic products from simple acrylic dentures to Valplast Flexible Dentures, with all partial dentures trimmed and fitted to duplicate models, to check for fit, contact areas, occlusion and path of insertion. We also have various options for retention including Dental D tooth coloured clasps.

## What is Swissedent?

Swissedent utilises the patients facial and smile features, age and gender to produce cosmetic natural dentures that restores physical appearance, optimum aesthetics and function, tissue support and comfort that benefits the patient, clinician and laboratory.

Swissedent utilises the Smile Make Over concept and the Dentogenic Concept which implies anterior teeth are aesthetically positioned to compliment the patients facial characteristics, smile, age and gender by reflecting natural light to hit certain teeth as with natural teeth. The shape and mould of teeth is formed via the same features, root contour and inter-dental areas are carved convexly with stippling to prevent food traps and provide a self cleansing hygienic denture.

### Technical Features:

Swissedent Dentures are all inclusive of special trays, base plates, anatomical articulations, re-trys, teeth, high impact acrylic and come with a 5 year guarantee. All Swissedent Dentures are presented with a Denture Kit Bag consisting of an Ultra Sonic, Denture hygiene instructions and a cleaning brush.

We provide short CPD presentations on prosthetic products to practices for their associates, which covers product information, advantages, selling points, limitations and clinical support, please phone us to book a short presentation. *For more information of Clinical Courses for dentures, contact Kash on 0208 520 8528*
