

# Introduction to our Dental Laboratory

## Our Technicians

All of our technicians and department managers are GDC registered and have undergone in-house training to maintain our quality control protocols.

## Communication

There is a single point of contact for each department with dedicated managers for each section: Admin, Accounts, CAD/CAM, Ceramics, Crown & Bridge, Implants & Prosthetics.

## Quality Control

All work is quality checked X3 times before being delivered.

## Consistency

All materials are measured out (water/powder ratios etc.) precisely from the manufactures instructions for all work to ensure consistent quality no matter how busy we get.

## Collection & Delivery Service

Our Dental Laboratory operates a free collection & delivery service across Greater London and much of Essex and Hertfordshire. We also provide a consistent postal service to areas outside of our collection & delivery areas.

# Bremadent Premier London Dental Laboratory | Managing Director

Welcome to Bremadent Premier London Dental Laboratory,

My name is Kash Qureshi I am Clinical Dental Technician and the Managing Director of Bremadent Premier London Dental Laboratory and run the Swissedent Denture Clinic in association with the Dental Laboratory.

I deal with over 400+ denture related cases weekly from a clinical and technical aspect and have undergone many courses in Crown & Bridge, Prosthetics, Implantology and Dental Laboratory Management. I am also Accredited in Valplast Flexible Dentures at Advanced Level Certification and Swissedent Certified to provide Swissedent Natural Looking Dentures to Patients and Swissedent Clinicians.

I qualified in the U.K (BTEC National Diploma & Foundation Degree: Dental Technology and Diploma in Clinical Dental Technology) and started my apprenticeship under John Gerrard and became manager at 21 and took over the laboratory as Managing Director in 2015. As of 2014/2015 the GDC confirmed that I was the youngest CDT in the UK.

I provide clinical / technical training and support for Dentists, Clinical Dental Technicians and Dental Technicians on Private Prosthetics via Swissedent and run various CPD seminars on Crown & Bridge, Implantology & New Dental Laboratory services.

Bremadent Premier London Dental Laboratory provide the following Dental Laboratory Services in London, UK & Europe: Crown & Bridge, Dental Implantology, Prosthetics, Vacuum formed & Simple Orthodontic Appliances.

We Provide over 500+ Dental Laboratory Products at different services levels please enquire If you would like any further information on 0208 520 8528 or email: [office@bremadent.co.uk](mailto:office@bremadent.co.uk).

All the best,

Kash Qureshi | Managing Director

# Company Profile | Bremadent Premier London Dental Laboratory

Bremadent Premier London is a Full Service Commercial Dental Laboratory based in London and was established in 1969 by John Gerrard. In 2015 BPL was taken over by Kash Qureshi as Managing Director in conjunction with the opening of the Swisedent Denture Clinic.

The laboratory started as a small one storey building adjacent to a dental practice . Over the years, BPL expanded to offer a full service and is now two storeys high with an added extension adjacent to the building for our second office, in-house clinic, sterilisation room and 12th department. This has made BPL the biggest and longest established full service Dental Laboratory in London History.

Our Dental Laboratory has always been at the forefront of technology and maintains its reputation of providing consistent high quality craftsmanship , excellent communication, comprehensive in-house training and being pioneers in dentistry. BPL has provided training for hundreds of young persons to have a career for life, which has enabled the majority of technicians to start up on their own Dental Laboratory.

Bremadent Premier Dental Laboratory offers our dentists everything they need to help their practice reach its full potential. Our laboratory has the framework in place to cater for large corporations and independent practices. We believe, no matter how big or small the practice, the patient always comes first and will be dealt with in a professional and ethical approach to manage their expectations.

Being a full service Dental Laboratory we offer crown & bridge, prosthetics, implants, vacuum formed appliances and shade taking facility's with dedicated managers for each department to make sure any issues are resolved quickly and smoothly through a single point of call.

Whilst most Dental Laboratories talk about quality, BPL guarantee it. The laboratory is built on the philosophy of communicating quality consistently.

# Crown & Bridge | BPL Dental Laboratory

We offer the full range of crown & bridge products from simple full gold crowns and composite inlays to complex full smile make overs and implant related restorations. Our department managers have been on various courses and have the expertise to support you from the first stages of treatment planning to the final restoration.

We train all our technicians in-house on the PTC system to maintain and monitor our Crown & Bridge standard. The PTC system ensures consistent results from aesthetics to occlusion, function to fit and margins to contact areas. Due to our technicians having a in depth understanding, it allows us to confidently ensure long lasting, aesthetically pleasing functional restorations that benefits the patient, clinician and laboratory.

# Implantology | BPL Dental Laboratory

We offer a full range of implant services from single implant crowns to All on 4 milled implant frame work bars. Our senior technicians have over 30 years experience in implants and have attended courses in the PANKEY institute in America which has given us the opportunity to work closely with our surgeons in diagnostic planning and design.

We are familiar with key implant systems including CAM LOG, Bränemark, Straumann, Nobel, Ankylos, Frialit, IMZ, Bio-Horizons and Astra tech, with experience in many others. We manufacture customized abutments to overcome many issues with compromised implant replacement and offer a customized zirconia based abutment that is milled in -house in our CAD/CAM department. We utilize CAD/CAM technology in designing complex framework bars and screw retained bridges with direct or abutment level connection.

With appropriate indications, bar retained over dentures can benefit the patient by being a cost effective alternative to traditional crown and bridge solutions.

The process begin with detailed planning and design, with the use of drill guides, radio opaque stents and diagnostic wax ups and our CAD/CAM system allows us to plan further into placement and design. With this technology restorations can be completed before implant placement has even been carried out, this ensures predictable and consistent results.

We provide short CPD presentations on implantology products to practices for their associates, which covers product information, advantages, selling points, limitations and clinical support, please phone us to book a short presentation.

# Prosthetics | BPL Dental Laboratory

We offer the full range of complete prosthetic products from standard acrylic dentures to Swissedent All on 4 implant dentures. Our Prosthetics department is run by our Clinical Dental Technician Kash Qureshi who also runs the Swissedent Denture Clinic to treat patients for dentures. Kash has an understanding of the clinical and technical aspect of prosthetics by dealing with over 400+ denture related cases weekly and can communicate jargon free clinical support throughout.

We train all our technicians in-house on the Swissedent natural denture system to maintain and monitor our Prosthetics standard. Swissedent utilises the patients facial and smile features, age and gender to produce natural dentures that restores physical appearance, optimum aesthetics and function, tissue support and comfort that benefits the patient, clinician and laboratory.

We provide a full range of partial prosthetic products from simple acrylic dentures to Valplast Flexible Dentures, with all partial dentures trimmed and fitted to duplicate models, to check for fit, contact areas, occlusion and path of insertion. We also have various options for retention including Dental D tooth coloured clasps.
