Valplast for Dentist's

### FREE! Valplast for Dentist's PDF guide

Valplast was the first flexible denture material in the world and has over 60 years of research and development. We now have a guide available on our website to help you with Valplast as a treatment option for your patients, the guide covers: *Valplast history, features, technical features, design factors, limitations & clinical help. This guide will provide a better understanding to Valplast Flexible Dentures.*

GO TO [www.bremadent.co.uk/clinical-guides](http://www.bremadent.co.uk/clinical-guides) to download printable pdf file.

### Run out of Lab Dockets!

You can now download our lab dockets from our website whilst you wait for your dockets to be printed, please inform our office if you have no more dockets.. go to [www.bremadent.co.uk/downloads](http://www.bremadent.co.uk/downloads)

### Fun Dental Fact: 😲

Snails can have around 25,000 teeth – and they are found on their tongue! By comparison, a human has 32, a dog has 42 and a cat has 30.

### CO/CR Designs!

Chromes are designed to be easily adapted and biocompatible whilst providing the patient with optimum comfort, function and hygiene.

The designs are based on minimizing risk of damage to the teeth and periodontum via major connectors placed 3mm away from gingival margin.

Clasps are added for retention and to resist displacement away from the oral tissues, whilst the lateral displacement during function is controlled via reciprocation and bracing.

## Labwork in the Spotlight!

Here is an example of what our Laboratory can do and like everything we do, it starts off with the most important aspect in our laboratory, accurately measured, vacuum mixed, clean models and anatomical articulation.. By utilising a full service Laboratory like us for your Prosthetics, Metal and Ceramic laboratory work, you can guarantee successful results.

Case: **Upper:** 1X 2 Unit posterior bridge, X1 Anterior 6 unit bridge + precision attachment, X1 milled crown with precision attachment, X1 Co/Cr 2 Tooth Denture with attachments. **Lower:** Valplast Flexible Denture.

## Did you know!

All of the above was manufactured without the use of CAD/CAM technology. Speak to Kash to book in a case like this today ! 0208 520 8528

## Implant Milled bars? Why not raise the bar!

## Composite inlays/ onlays

Indirect Composite is a light cured synthetic resin that has a composition of two or more materials including glass particles. Studies have shown that composite can have similar longevity to amalgam restorations but have far superior aesthetics. Indirect composite restorations provide a high strength and durable restoration whilst maintaining the natural opalescence and excellent lifelike aesthetics.

## What is RPI on Chromes?

Clasp design with the RPI (mesial rest seat, plate, i bar clasp) system is favourable on free - end saddles due to the distribution of the vertical applied forces which stops crown movement distally and minimizes the risk of damage to the periodontum and teeth.

## Why Choose Bremadent!

Consistency: Every job done is a job well done.
